# Opioid Overdose Prevention Seminar for Hospitals

Prevent opioid overdose deaths by learning how hospitals can be involved in statewide overdose prevention efforts. During this virtual event, participants will hear how hospitals and emergency departments can distribute naloxone, increase access to medications to treat opioid use disorder, and create stronger linkage to community resources. Attendees will have the opportunity to network and learn from Illinois hospitals and organizations that are engaged in overdose prevention efforts.

## ▶ Featured Speakers

### Howard S. Kim, MD, MS

**Assistant Professor**  
Department of  
Emergency Medicine  
*Center for Health  
Services & Outcomes  
Research*  
Northwestern  
University  
*Feinberg School of  
Medicine*

Dr. Kim will share his experience working with various hospitals engaged in naloxone distribution, including highlighting different barriers hospitals may face and how to overcome these barriers.

### Michael Nelson, MD, MS, FACEP, FASAM, FACMT

**Attending Physician**  
Emergency Medicine,  
Medical Toxicology,  
Addiction Medicine  
*Cook County Health,  
John H. Stroger Jr.  
Hospital of Cook  
County  
NorthShore University  
Health System*

**Clinical Associate Professor**  
*University of Chicago*

**Assistant Professor**  
Department of Emergency Medicine  
*Rush Medical College*

Dr. Nelson will discuss initiating medication assisted treatment (MAT) in the emergency department or hospital setting, and how to refer patients to an appropriate treatment provider once MAT has been initiated.

## ▶ Continuing Education

Earn up to 3.0 CME/CE credits for physicians of all specialties, physician assistants, advanced practice nurses, nurses, pharmacists, and social workers.

## ▶ Learning Objectives

- Share successful naloxone distribution models from emergency departments and hospitals.
- Identify effective sustainability options for naloxone distribution from emergency departments and hospitals.
- Develop plans to link patients and their family members from hospital discharge to treatment and harm reduction resources.
- Identify how to build the capacity for emergency departments and hospitals to initiate medication-assisted treatment.
